

Members of the Ontario Legislature,

It will not be a good day for you and the other conservative members if this Bill 37 is passed in

the current proposed form and wording. The deceitful, autocratic process of pushing this

legislation through will be the end of Ford come June if all seniors vote. And I for one will be

informing my friends, I am 64, still with my faculties, but I will use my knowledge and abilities

to pass on the horrid, mean spirited methods this current government is using to create modern

day concentration camps for seniors. I thought we had seen the last of them in 1945, but not so

in Ontario thanks to the past and current governments.

My Dad died because of a fall in a for profit long term care home in 2000 in Wallaceburg,

Ontario. I always wondered how long he laid on the floor of his room before help arrived. He

died three days later from crushed vertebra. Yes, his golden years were spent under another

very rotten conservative government under the auspices of Mike Harris who now has his butt

Page two

parked in a executive position with for profit Chartwell. But Bill Davis and also Ernie Eaves were at the money trough as well with their hands in the pockets of for profit ownership. That must be why you push for for-profit existence rather than making nursing homes public. It is just gravy train for despicable former politicians it seems. And slave labour work for the employees.

You know the issues, but continue to turn a blind eye. Not enough care per senior, not enough staff, not enough nurses, staff being underpaid for their work and services, forced overtime, loss of holidays, no protection for staff whistleblowers that actually have a conscience and want to do the right thing. Seniors abused, left to sit in soiled garments for hours, under fed, left in their rooms for hours upon hours. My sister-in-law just quit working at a long term care facility in

Page three

November because of the work issues. She loved working with seniors, but hated the evil

circumstances under which she was forced to work. No say or input. Just do as you are told

. My nephew's wife also works in the same long term care is afraid to speak as she informed

me that in being hired she had to sign a contract stating she was not allowed to speak of the any

conditions and happenings within that home. MUZZLED! As you are trying to do with this

speedy push with Bill 37. You lauded them words words like "heros", but continue to treat

them like second class citizens for the work they do. And now you want to muzzle the public

from having its say as well. How dare you! Now this is quite an autocratic move in what I

thought was once a democratic society. You know the issues yet you look the other way to all

these concerns. I often wonder what for-profit nursing home the conservative politicians will

Page 4

line up to live in. Orchard Villa???.....the finest in the province? ... would that be your

choice.... where one of the highest death rates occurred during the pandemic? And you

continue to give them new licences to run death pits? And yet no one there was charged, fined or

jailed because of the neglect. NO ONE! Oh yes this current Conservative government passed

legislation to prevent families or individuals from suing for profit owners for their neglect, abuse

and starvation. The only thing that seems to matter to this government is saving money off the

backs of seniors but wasting it in so many other ways. You have no interest in protecting or

caring for lives. You sees seniors are useless, expendable and no longer of any value except for

their money. This government is blinded by for profit ownership who gouge and rob the elderly

to patronize their shareholders and ditched or former politicians. Just such a cozy relationship

Page 5

between these three parties. That is your priority, not the care of seniors in this province that you are supposedly responsible for. And you will continue to allow this if this legislation is passed. You are sly, deceitful sneaks. In my mind this legislative process is an absolute derelict of duty by this current government. I can't wait until June arrives so I can be one of many seniors who votes this government out of office. There are not enough words to describe how despicable, deceitful, cruel, and heartless this legislation is, as well as the current members of this governments no have proposed it. And if you support it, well you are just as heartless as the rest. . This government has be to the cruelest and most gutless of modern time, as they rush this soried legislation through. You also must be so proud that the death rate of seniors in Canada, particularly Ontario, made the United States news! They shared ...How horrific was

the treatment of our seniors! We rarely are discussed in the US, but this made their news circuit

. As I age, I think I will contemplate and hope for the assisted suicide before being placed in a

for profit nursing home. I have no interest in being treated like dirt in a modern day

concentration camp pit or being robbed blind of my hard earn money. We live in a very

province these days. The last three and a half years have been absolute hell. Only big greedy

businesses seems to count for this current government and the lives of its senior citizens and

many others are of no consequence to them. They will brag of their lying ads of how much they

are doing for seniors. Please hook Ford up to a lie detector unit as he speaks his many untruths

But you will get old too, and let's hope you receive the same respect and care that current

seniors are suffering under. Possibly the current individuals who are forcing this Bill 37 through

should spend their next vacation or part of their legislative time in a seniors residence run by

greedy for profit owners and see how much they enjoy the rotten circumstances that are being

created by those in power. One would only hope they would wake up to the horrid reality of

their decisions.
