09857326	Humira 40mg/0.8mL Inj Sol - Pref Syr Pk	ADALIMUMAB	ABB	707.2200
09857327	Humira 40mg/0.8mL Inj Sol - Pref Pen Pk	ADALIMUMAB	ABB	707.2200

Note: For the treatment of severe* plaque psoriasis in patients 18 years of age or older who have experienced failure, intolerance, or have a contraindication to adequate trials of several standard therapies**.

Claims for the first 6 months must be written by a dermatologist.

Monitoring of patients is required to determine if continuation of therapy beyond 12 weeks is required. Patients not responding adequately at 12 weeks should have treatment discontinued.

* Definition of severe plaque psoriasis:

Body Surface Area (BSA) involvement of at least 10%, or involvement of the face, hands, feet or genital regions, AND

Psoriasis Area and Severity Index (PASI) score of at least 10, (not required if there is involvement of the face, hands, feet or genital regions), AND

Dermatology Life Quality Index (DLQI) score of at least 10.

** Definition of failure, intolerance or contraindication to adequate trials of standard therapies:

- 6 month trial of at least 3 topical agents including vitamin D analogues and steroids, AND
- 12 week trial of phototherapy (unless not accessible), AND
- 6 month trial of at least 2 systemic, oral agents used alone or in combination
 - Methotrexate 15-30mg per week
 - Acitretin (could have been used with phototherapy)
 - Cyclosporine

Maintenance/Renewal:

After 3 months of therapy, patients who respond to therapy should have:

- At least a 50% reduction in PASI, AND
- at least a 50% reduction in BSA involvement, AND
- at least a 5 point reduction in DLQI score

Dosing Approved by Health Canada

Approvals will only allow for standard dosing for Humira (adalimumab): the recommended dose is an initial 80mg administered subcutaneously, followed by 40mg subcutaneously given every other week starting one week after the initial dose. The Committee to Evaluate Drugs noted that this is the Manufacturer's recommended dosing regimen, as approved by Health Canada. If the patient has not responded adequately after 12 weeks of treatment at the Health Canada approved dose, higher doses are not recommended and the physician should consider switching to an alternative biologic agent.
