02368544	Brilinta 90mg Tab	TICAGRELOR	AZC	1.4800
----------	-------------------	------------	-----	--------

Reason for Use Code Clinical Criteria

441 In combination with ASA 75mg – 150mg (See Note a) below) daily for patients with acute coronary syndrome (i.e., ST elevation myocardial infarction [STEMI], non-ST elevation myocardial infarction [NSTEMI], or unstable angina [UA] with **ONE** of the following:

1. Failure on optimal clopidogrel and ASA therapy as defined by definite stent thrombosis (See Note b) below), **or** recurrent STEMI, **or** NSTEMI **or** UA after prior revascularization via percutaneous coronary intervention (PCI)

OR

2. STEMI **and** undergoing revascularization via PCI

OR

3. NSTEMI or UA with high risk angiographic features **and** undergoing revascularization via PCI

Treatment must be initiated in hospital. Funding approval is for up to 1 year.

Notes:

- a) Co-administration of ticagrelor with high maintenance dose ASA (greater than 150mg daily) is not recommended.
- b) Definite stent thrombosis, according to the Academic Research Consortium, is a total occlusion originating in or within 5mm of the stent, or is a visible thrombus within the stent, or is within 5mm of the stent in the presence of an acute ischemic clinical syndrome within 48 hours. Definite stent thrombosis must be confirmed by angiography or by pathologic confirmation of acute thrombosis.
- c) Ticagrelor is contraindicated in patients with active pathological bleeding, in those with a history of intracranial hemorrhage and moderate to severe hepatic impairment.

LU Authorization Period: 1 year

DBP

Alitretinoin should only be prescribed by physicians knowledgeable in the use of retinoids systemically, who understand the risk of teratogenicity in females of child bearing potential. Alitretinoin is contraindicated in pregnancy and females must not become pregnant while taking alitretinoin and for at least one month after its discontinuation. Please refer to the Toctino product monograph for details on use in women of child bearing potential.

02337649	Toctino 30mg Cap	ALITRETINOIN	GSK	21.9900

**Reason for
Use Code**

Clinical Criteria

442

For adult patients with severe (see note 1 below) chronic (see note 2 below) hand eczema AND unresponsive to an 8 week course of high potency topical corticosteroids.

1. Severe defined based on the Physician Global Assessment (PGA), including:

- At least one of the following cardinal features present at baseline as moderate or severe:
erythema, scaling, hyperkeratosis/lichenification; **and**
- one of the following features present as severe:
vesiculation, edema, fissures, pruritus/pain; **and**
- with an area of greater than 30% of affected hand surface

2. Chronic defined as:

- persists for greater than 3 months; **OR**
- reoccurs greater than or equal to 2 times within 12 months

LU Authorization Period: 1 Year.

02380048	Toviaz 8mg Tab	FESOTERODINE FUMARATE	PFI	1.5000

**Reason for
Use Code**

Clinical Criteria

290

For patients with urinary frequency, urgency or urge incontinence who have:

Failed to respond to behavioral techniques AND an adequate trial of oxybutynin with gradual dose escalation has shown to be either ineffective or resulted in unacceptable side effects.

NOTE: If after a trial of 2 weeks patients continue to experience similar side effects and no greater efficacy than oxybutynin, continued therapy with this more costly agent should be reassessed.

Antimuscarinic agents should be used with caution in the **elderly** due to potentially serious adverse effects (e.g. confusion, psychosis, acute urinary retention, constipation). Antimuscarinic agents should be avoided in older adults with pre-existing cognitive impairment (e.g. dementia) and those who are already using other drugs with significant anticholinergic effects (e.g. tricyclic antidepressants) in order to avoid a high overall anticholinergic drug burden.

LU Authorization Period: Indefinite.
