FOREWORD

FOREWORD

Ontario has among the safest roads in North America.

In 2010, there were 0.63 road fatalities per 10,000 licensed drivers. This was the second lowest rate in North America, and marks the 12th consecutive year that Ontario has had the lowest or second-lowest fatality rate among all jurisdictions in North America.

The number of licensed drivers on our roads increased by more than 143,000 to over 9.2 million in 2010, an increase of 1.6 per cent from 2009.

The number of registered vehicles also increased by nearly 123,000 to over 8.5 million in 2010, an increase of 1.5 per cent.

There has been a long-term decrease in the number of drinking and driving fatalities: a 63.6 per cent decline since 1988.

Recent efforts to reduce fatalities from speed-related collisions in Ontario have resulted in a 23 per cent reduction, from 113 in 2009 to 87 in 2010.

Ontario Road Safety Annual Report 2010

What is the Ontario Road Safety Annual Report (ORSAR)?

On average, one person is killed on Ontario's roads every 15 hours.

Road safety is a priority for the Ontario government. As technology, vehicles, and people's attitudes evolve over time, so do transportation needs and demands. With shifting economic and demographic factors, new road safety challenges can arise.

ORSAR allows the Ontario government to monitor its progress in improving road safety year-by-year. The report provides valuable data and guides the government as it determines where more effort is required.

ORSAR is used by the Ministry of Transportation, Ontario (MTO) for policy and program analysis and development, road safety research, public education and performance measurement. ORSAR data is also used by road safety and injury prevention organizations, transportation associations, research institutions, police services and other ministries and governments.

To help the government address and meet new challenges, ORSAR provides valuable insights about long-term and emerging trends in Ontario and across other jurisdictions in North America.

To produce ORSAR, MTO collects data from several different sources, including police services, other ministries, and the Office of the Chief Coroner.

Ontario's roads consistently rank among the safest in North America. Over the past 12 years, our province has ranked either first or second among all North American jurisdictions. By continuing to work with our road safety partners and monitoring trends captured in ORSAR, Ontario can continue to develop new and innovative road safety strategies that will help save lives and keep Ontario's roads among the safest in the world.

Key Road Safety Findings for Ontario in 2010

For more than 20 years, Ontario has measured road safety by calculating the number of collision-related fatalities for every 10,000 licensed drivers.

In Ontario, the fatality rate per 10,000 licensed drivers in 2010 was 0.63 – one of the lowest ever recorded. The actual number of fatalities was 579. This is the second-lowest number of fatalities since 1944.

The fatality rate places Ontario second in all of North America in the number of road fatalities. Ontario has now ranked first or second for 12 years in a row.

Road Safety in Ontario: 2009 vs 2010		
Category	2009	2010
Number of Fatalities	564	579
Number of Injuries	62,562	64,514
Fatality Rate per 10,000 Licensed Drivers	0.62	0.63
Injury Rate per 10,000 Licensed Drivers	68.7	69.8

Road Safety in Ontario: Significant Progress Since 2001				
Category	2001	2010	Change	% Change
Number of Fatalities	845	579	(266)	(31.5)
Number of Injuries	81,782	64,514	(17,268)	(21.1)
Fatality Rate per 10,000 Licensed Drivers	1.02	0.63	(0.39)	(38.2)
Injury Rate per 10,000 Licensed Drivers	98.9	69.8	(29.1)	(29.4)

Top Priority Road Safety Issues

Road safety is a challenge that requires commitment to build on our efforts year after year. We can take pride in milestone achievements, but keep in mind that they are milestones – the challenge is always to do more, to save more lives.

In recent years, the Ontario government has led the way by working with many road safety partners, including police, public health and safety organizations in the public, corporate and not-for-profit sectors. With support from these partners, Ontario has developed and introduced numerous pieces of legislation aimed at making our roads safer each year.

Recent legislation and new measures include:

- street racing / stunt driving legislation
- blood Alcohol Content (BAC) warn range sanctions / reduced suspension
- zero BAC for drivers 21 and under
- distracted driving legislation
- speed limiters for large trucks
- expanded vehicle impoundment program
- increased penalties for infractions
- a made-in-Ontario cycling strategy

ORSAR 2010 indicates that our legislation, combined with strong enforcement and education, is achieving positive results. A quick look at some key statistics underlines this continuing success.

Drinking and Driving

Ontario's drinking and driving fatality rate was 0.17 per 10,000 licensed drivers – a reduction of 76 per cent from 0.72 in 1988. The actual number of drinking and driving fatalities was 160 in 2010.

Speeding / Street Racing / Aggressive Driving

The number of people killed in Ontario in speed-related collisions dropped from 113 in 2009 to 87 in 2010 – a reduction of 23 per cent.

Street racers and other drivers who put other road users at risk by driving aggressively now face roadside vehicle impoundment and licence suspensions, and upon conviction face a fine of up to \$10,000, a jail term of up to six months, and prolonged licence suspensions.

Senior Drivers' Fatalities

Fatalities among senior drivers age 80 and over increased from 21 in 2009 to 24 in 2010.

Large Truck Fatalities

Ontario has some of the most stringent truck safety laws in North America.

There were 109 fatalities in collisions involving large trucks in 2010, an increase from 99 in 2009.

Despite the increase in fatalities, none of the 112 large trucks involved in fatal crashes was found to have safety defects that might have contributed to the crash.

Seat Belts

In 2010, 100 vehicle occupants were killed while not wearing a seat belt — up from 88 in 2009.

Vulnerable Road Users

The number of motorcycle rider fatalities increased to 47 from 39 in 2009.

Pedestrian fatalities decreased to 95 from 114 in 2009.

Bicycling fatalities increased to 18 from 13 in 2009.

Ontario's Progress: Road Safety Vision 2010

The Canadian Council of Motor Transport Administrators Road Safety Vision 2010 is a national effort that aims to make Canada's roads the safest in the world. Its road safety targets were officially endorsed by all ministers responsible for transportation and highway safety in 2000. The Vision provides Canada's road safety community with benchmarks to help develop new strategies and measure intervention efforts.

The national target set by Road Safety Vision 2010 was a 30-per-cent decrease in the average number of road fatalities or serious injuries during the 2008-10 period compared to the baseline period of 1996-2001.

Ontario achieved a 32 per cent reduction in fatalities and a 40 per cent reduction in serious injuries during the 2008-2010 period.

Road Safety: Ontario Progress on Targets set by Road Safety Vision						
Categories	Baseline Average	Target	2008	2009	2010	2008-2010 Average
Fatalities	874	612	631	564	579	591
Serious Injuries	4,507	3,115	2,942	2,603	2,558	2,701

Looking Ahead: Next Steps

For 12 years in a row, Ontario has ranked first or second in North America as the jurisdiction with the lowest number of road fatalities per 10,000 licensed drivers. The province has also achieved target reductions in fatalities and serious injuries, despite annual increases in the number of licensed drivers.

Road safety is a challenge that evolves with growing populations, new technologies and urban and rural development. The future brings with it new priorities that we are committed to address. These include:

- drug-impaired driving
- sharing the road with vulnerable road users, such as pedestrians and cyclists
- senior drivers and driver fitness in light of an aging population and health issues
- all-terrain vehicle safety

New approaches to improving road safety could include:

- automated speed enforcement
- encouraging and enabling a greater use of technology
- incentive programs such as reduced penalties for drivers who take part in monitoring/remediation programs

Social marketing has been an important means to educate the public and help save lives. It aims to change behaviours and change attitudes, to promote safety awareness and make our streets safer.

Studies show road safety marketing campaigns result in a 12 per cent reduction in collisions. Ontario aims to be among the many jurisdictions that emphasize proactive, preventative measures, particularly education and awareness initiatives that reduce risky driving behaviour.

Conclusion

The statistics confirm that Ontario is a world leader in road safety.

ORSAR 2010 shows that our efforts have been paying off, and many milestones have been achieved. As we review the findings of this year's report, we will continue to work with our partners to achieve more milestones, and save more lives. There is room for improvement, and we pledge to be vigilant in facing the challenges ahead.

Key Road Safety Statistical Trends

Number of Fatalities and Licensed Drivers, 1980–2010

Between 1980 and 2010, the number of licensed drivers increased by 85 per cent. In contrast, the number of fatalities decreased by 62 per cent over this period.

Number and Rate of Major and Minor Injuries, 1980–2010

In 2010, 64,514 people were injured (including major, minor and minimal injuries) in motor vehicle crashes, 36,853 fewer than in 1980. This puts the number of injuries on the province's roadways among its lowest level since 1965.

Fatality and Injury Trends for Different Age Groups

Number of Persons Age 0–9 Killed and Injured, 1990–2010

Between 1990 and 2010, the number of traffic fatalities and injuries among children aged 0-9 has dropped steadily, leading to an overall decline of 65 per cent.

Number and Rate* of Drivers 16–19 Years Old Killed and Injured, 1990–2010

Both the number and per licensed drivers rate of 16-19 year old driver casualties (deaths or injuries) have declined, with a 61 per cent decrease in the number killed/injured and a 74 per cent decline in the casualty rate since 1990. Over the time period 1990-2010, the number of licensed drivers aged 16-19 increased by 48 per cent, from 322,542 to 478,342.

Number and Rate* of Drivers Aged 65 and Over Killed and Injured, 1990–2010

The number of drivers aged 65 and over killed and injured has increased since 1990. However, the population of drivers age 65 and over has been increasing more rapidly, therefore, the casualty rate per 10,000 licensed drivers has decreased by 41 per cent.

Large Trucks

Number and Rate* of Fatalities in Large Truck Collisions; Large Truck Registrations, 1990–2010

Ontario's data shows that despite an increase of 64 per cent in the number of large trucks registered in Ontario, the number of large truck fatalities decreased from 197 in 1990 to 109 in 2010, down 45 per cent.

Drinking and Driving

Number and Rate* of Drinking and Driving Fatalities, 1990–2010

Both the number of drinking and driving fatalities and the rate per 10,000 licensed drivers have declined dramatically from 1990, by 54 per cent and 68 per cent respectively.

Vulnerable Road Users

Number and Rate* of Motorcycle Fatalities, 1990–2010

Motorcycle registrations increased 5 per cent from 200,810 in 2009 to 211,536 in 2010. At the same time, motorcycle rider fatalities increased from 39 in 2009 to 47 in 2010.

Over the long term, between 1990 and 2010, there has been a 64 per cent decline in the fatality rate per 10,000 motorcycle registrations.

Number of Bicycle Fatalities and Serious Injuries, 1990–2010

Between 1990 and 2010, the number of bicycle rider fatalities fluctuated between a high of 36 in 1998 and a low of 9 in 2000. There were 18 bicycle rider fatalities in 2010.

Number of Pedestrian Fatalities and Serious Injuries, 1990–2010

Between 1990 and 2010, the number of pedestrian fatalities was highest in 1991 with 157, and reached its lowest level in decades in 2008 with 94. The number of pedestrian fatalities decreased from 114 in 2009 to 95 in 2010, down by 17 per cent. However, the number of pedestrian serious injuries increased from 397 in 2009 to 420 in 2010, up 6 per cent.

OVERVIEW

1. OVERVIEW

This section provides a synopsis of key road safety statistics such as the total number of traffic fatalities, injuries, collisions, licensed drivers and registered vehicles.

The primary measure of road user safety in Ontario is the number of fatalities for every 10,000 licensed drivers. In 2010, Ontario's fatality rate of 0.63 per 10,000 licensed drivers was the second lowest ever recorded in Ontario. Ontario continued to be a road safety leader in North America.

The information on hospitalizations and other statistics in this section is a stark reminder of the human and economic cost of motor vehicle collisions, both in terms of lives lost, pain and suffering, and the impact on Ontario's healthcare system, which affects everyone in Ontario.

Figure 1 Total Number of Fatal and Injury Collisions in Ontario, 1988–2010

1A. SYNOPSIS

Selected Statistics: 2010	
Total Reportable Collisions	215,533
Total Drivers Involved in Collisions	385,753
Total Vehicles Involved in Collisions	400,820
Fatal Collisions	534
Personal Injury Collisions	44,430
Property Damage Collisions	170,569
Persons Killed	579
Drivers Killed (excludes All Terrain Vehicle and Snow Vehicle Drivers)	362
Drivers Killed (Impaired or Had Been Drinking)	117
Passengers Killed	115
Pedestrians Killed	95
Other Road Users Killed	7
Persons Injured	64,514
Estimated Ontario Population (2010)	13,223,800
Licensed Drivers	9,245,267
Registered Motor Vehicles	8,560,878
Estimated Vehicle Kilometres Travelled (in millions)	129,637
Number of Persons Killed in Motor Vehicle Collisions per 100,000 People in Ontario	4.38
Number of Persons Killed in Motor Vehicle Collisions per 100 Million Kilometres Travelled	0.45
Collision Rate per 100 Million Kilometres Travelled	166.26
Fatal Collision Rate per 100 Million Kilometres Travelled	0.41
Number of Persons Killed in Motor Vehicle Collisions per 10,000 Licensed Drivers	0.63

1B. HEALTH PERSPECTIVE

Table 1.1: Selected Diagnoses of Motor Vehicle Collision Injuries Hospitalized in Ontario, Fiscal Year 2009/2010

Selected Diagnoses	Hospital Admissions	Hospital Days of Stay
Fracture of head	108	659
Fracture of neck and trunk	773	7,667
Fracture of upper limb	466	2,902
Fracture of lower limb	1,205	11,868

THE PEOPLE

2. THE PEOPLE

This section highlights traffic fatalities and injuries by severity and characteristics of the road users involved. Key historical road safety data – covering a period of more than 75 years – is also provided to assist in analyzing long-term safety trends in Ontario.

Highlights in this section include an increase in the number of traffic fatalities from 564 in 2009 to 579 in 2010; the number of serious injuries decreased from 2,603 in 2009 to 2,558 in 2010. At the same time, the number of licensed drivers increased by 143,329, the number of registered motor vehicles increased by 122,969 and the estimated distance driven in Ontario increased by 3,835 million kilometers.

Out of 862 drivers involved in fatal collisions, 154 were drinking drivers, 65 drivers were coded as inattentive, and 82 were speeding. Despite the fact that about 96 percent of Ontario drivers use seat belts, 100 of vehicle occupant fatalities were not using seat belts at the time of the crash.

Figure 2 Persons Involved in Fatal and Injury Collisions by Severity of Injury, 2010

2A. PEOPLE IN COLLISIONS

Table 2.1: Category of Involved Person by Severity of Injury in Fatal and Personal Injury Collisions, 2010

Category of Involved Person	Severity of Injury					Total
	None	Minimal	Minor	Major	Fatal

Total	57,825	32,203	29,753	2,558	579	122,918

* Includes bus passengers

** In this table, all terrain vehicles include two-wheel, three-wheel and four-wheel off-road vehicles.

Only persons involved in HTA reportable fatality and injury collisions are shown in this table (for more information on special vehicles, see Chapter 6).

Fatal: Person killed immediately or within 30 days of the motor vehicle collision.

Major: Person admitted to hospital.

Minor: Person went to hospital and was treated in the emergency room but was not admitted.

Minimal: Person did not go to hospital when leaving the scene of the collision. Includes minor abrasions, bruises and complaints of pain.

None: Uninjured person.

UK = Unknown

Only persons involved in HTA reportable collisions are shown in this table (for more information on special vehicles, see Chapter 6).

Table 2.4: Sex of Driver by Class of Collision, 2010

Sex of Driver	Class of Collision			Total
	Fatal	Personal Injury	Property Damage	
Male	658	47,841	176,166	224,665
Female	185	31,130	105,610	136,925
Unknown*	19	4,146	19,998	24,163
Total	862	83,117	301,774	385,753

* This includes situations where the enforcement officer is unable to make a determination, e.g., hit and run.

Fatal Collision: A motor vehicle collision in which at least one person sustains bodily injury resulting in death within 30 days of the collision.

Personal Injury Collision: A motor vehicle collision in which at least one person involved sustains bodily injury not resulting in death.

Property Damage: A motor vehicle collision in which no person sustains bodily injury, but in which there is damage to any public property or damage to private property including damage to the motor vehicle or its load.

Table 2.5: Driver Condition by Class of Collision, 2010

Condition of Driver	Class of Collision			Total
	Fatal	Personal Injury	Property Damage	
Normal	542	61,960	229,385	291,887
Had Been Drinking	42	771	1,704	2,517
Ability Impaired – Alcohol over 0.08	103	608	1,434	2,145
Ability Impaired Alcohol	9	416	798	1,223
Ability Impaired Drugs	5	92	164	261
Fatigue	16	578	1,203	1,797
Medical/Physical Disability	19	513	501	1,033
Inattentive	65	12,448	28,207	40,720

Unknown **	54	5,453	37,357	42,864
Total	862	83,117	301,774	385,753

* Driver condition is not defined above.

** This includes situations where the enforcement officer is unable to make a determination, e.g., hit and run.

Had Been Drinking: Driver had consumed alcohol but his/her physical condition was not legally impaired.

Ability Impaired Alcohol over 0.08: Driver had consumed alcohol and upon testing was found to have a blood alcohol level in excess of 0.08 grams of alcohol per 100 millilitres of blood.

Ability Impaired Alcohol: Driver had consumed sufficient alcohol to warrant being charged with a drinking and driving offence.

Inattentive: Driver was operating a motor vehicle without due care and attention or placing less than full concentration on driving, e.g., changing radio stations, consuming food, reading, talking on phone or two-way radio, using headphones.

Table 2.6: Driver Age by Driver Condition in all Collisions, 2010*

Driver Age	Driver Condition						Total
	Normal	Had Been Drinking	Impaired Alcohol over 0.08	Ability Impaired Alcohol	Other	Unknown	
Under 16	72	2	0	0	51	23	148
16	718	14	6	1	222	61	1,022

THE COLLISION

3. THE COLLISION

This section profiles the types of collisions that occur on Ontario's roads. To prevent motor vehicle collisions, we need to understand the context in which they occur, including hour of occurrence, day, month, collision type, location, and environmental factors. Identifying these contributing factors is an important step toward reducing collisions on Ontario's roads.

The number of fatal collisions increased from 516 in 2009 to 534 in 2010, up by 18, and the number of injury collisions increased from 44,054 in 2009 to 44,430 in 2010, up by 376. The number of property damage collisions decreased from 171,745 in 2009 to 170,569 in 2010, down by 1,176. The fatality rate per 100 million kilometers traveled in Ontario remained the same at 0.45 in 2009 and 2010.

Figure 3 Fatality Rate per 100 Million Vehicle Kilometres Travelled in Ontario, 1988–2010

3A. TYPES OF COLLISIONS

Table 3.1: Class of Collision, 1988–2010

Year	Class of Collision			Total
	Fatal	Personal Injury	Property Damage	
1988	1,076	76,724	150,598	228,398
1989	1,106	77,852	168,080	247,038
1990	959	65,912	153,317	220,188
1991	956	59,242	153,471	213,669
1992	942	58,889	164,418	224,249
1993	987	58,932	168,915	228,834
1994	875	58,525	167,596	226,996
1995	860	58,273	159,952	219,085
1996	816	57,791	156,417	215,024
1997	807	56,121	164,572	221,500
1998	768	55,441	157,147	213,356
1999	763	55,764	165,435	221,962
2000	737	57,279	182,614	240,630
2001	733	54,479	178,792	234,004
2002	770	56,516	187,356	244,642
2003	754	52,757	192,952	246,463
2004	718	49,948	180,882	231,548
2005	684	49,584	179,990	230,258
2006	692	47,411	168,144	216,247
2007	683	47,014	185,790	233,487
2008	574	44,219	184,403	229,196
2009	516	44,054	171,745	216,315
2010	534	44,430	170,569	215,533

Table 3.2: Collision Rate Per One Million Kilometres Travelled, 1988–2010

Year	Collision Rate	Year	Collision Rate	Year	Collision Rate
1988	3.2	1996	2.7	2004	1.9*
1989	3.2	1997	2.7	2005	1.8*
1990	3.0	1998	2.5	2006	1.66*
1991	2.9	1999	2.5	2007	1.87*
1992	3.1	2000	2.0*	2008	1.84*
1993	3.0	2001	2.0*	2009	1.72*
1994	2.9	2002	2.0*	2010	1.66**
1995	2.8	2003	2.1*		

* Based on Statistics Canada estimates of Vehicle Kilometres Travelled.

** Based on Westbay Research Inc. estimates for CCMTA

Table 3.3: Motor Vehicles Involved in Collisions Based on Initial Impact, 2010

Motor Vehicle in Collision Involving	Class of Collision			Total
	Fatal	Personal Injury	Property Damage	
Moveable Objects:				
Other Motor Vehicles	524	66,484	257,004	324,012
Unattended Vehicles	7	465	13,362	13,834
Pedestrian	93	4,327	327	4,747
Cyclist	19	2,422	542	2,983
Railway Train	2	12	18	32
Street Car	1	58	292	351
Farm Tractor	2	24	59	85
Domestic Animal	1	62	702	765
Wild Animal	3	479	12,691	13,173
Other Moveable Objects	4	125	295	424
Sub-total	656	74,458	285,292	360,406
Fixed Objects:				
Cable Guide Rail	0	51	250	301
Concrete Guide Rail	2	248	954	1,204
Steel Guide Rail	1	162	667	830
Pole (Utility Tower)	2	258	1,232	1,492
Pole (Sign/Parking Meter)	0	84	781	865
Fence/Noise Barrier	0	16	177	193
Culvert	1	9	29	39
Bridge Support	1	17	97	115
Rock Face	1	12	23	36
Snow Bank or Drift	0	18	141	159
Ditch	7	252	791	1,050
Curb	11	430	1,537	1,978
Crash Cushion	1	20	46	67
Building or Wall	0	27	152	179
Water Course	0	0	12	12
Construction Marker	0	13	68	81
Tree, Shrub, or Stump	4	130	408	542
Other Fixed Object	0	200	1,148	1,348
Sub-total	31	1,947	8,513	10,491

Table 3.3: Motor Vehicles Involved in Collisions Based on Initial Impact, 2010 (continued)

Motor Vehicle in Collision Involving	Class of Collision			Total
	Fatal	Personal Injury	Property Damage	
Other Events:				
Ran Off Road	80	2,562	5,933	8,575
Skidding/Sliding	91	3,515	11,355	14,961
Jack-knifing	0	15	80	95
Load Spill	0	13	75	88
Fire/Explosion	0	5	167	172
Submersion	0	1	4	5
Rollover	2	143	215	360
Debris on Road	3	115	1,036	1,154
Debris off Vehicle	5	86	894	985
Other Non-Collision Event	17	1,050	2,461	3,528
Sub-total	198	7,505	22,220	29,923
Total	885	83,910	316,025	400,820

Table 3.4: Initial Impact Type by Class of Collision, 2010

Initial Impact Type	Class of Collision			Total
	Fatal	Personal Injury	Property Damage	
Approaching	112	755	1,452	2,319
Angle	65	4,602	11,817	16,484
Rear End	29	12,881	50,435	63,345
Sideswipe	14	2,944	20,358	23,316
Turning Movement	40	10,139	31,352	41,531
With Unattended Motor Vehicle	8	467	13,300	13,775
Single Motor Vehicle	266	12,457	39,219	51,942
Other	0	185	2,636	2,821

PLACE OF COLLISION

4. PLACE OF COLLISION

This section pinpoints the location of collisions in Ontario and provides a breakdown of the various classes of collision by municipality. The location of collisions provides vital information to MTO and local road authorities about the safety of Ontario's roads and highways. Comparing the number of collisions and injuries within specific municipalities over the years may help to highlight trends in road safety over time. This information helps MTO and local authorities to prioritize their infrastructure projects, enforcement activities, and education campaigns.

Changes to the names and boundaries of municipalities due to amalgamation or annexation may mean that the statistics found in Table 4.1 of this section are not comparable from year to year. Information on population size by Ontario's municipalities can be found at the Statistics Canada website at www.statcan.gc.ca. These figures can be used to determine per capita fatality or injury rates by municipality for comparison purposes.

Table 4.1: Place of Collision – Class of Collision, Persons Killed, Injured and Motor Vehicle Registrations, 2010

* This number does not match the vehicle population in Table 5.5; it does not include 10,838 registered vehicles that are not associated with a county or region in Ontario.

Legend:

C = City
 T = Town
 TP = Township
 M = Municipality
 ST = Separated Town
 V = Village

Other Areas:

Includes jurisdictions with less than 1,500 population and/or experienced amalgamations/annexation, or name change after 1992.

Table 4.1 is not comparable to previous years.

THE VEHICLE

5. THE VEHICLE

This section examines vehicles involved in motor vehicle collisions in Ontario. In 2010, passenger vehicles made up nearly 75 per cent of the vehicle population in Ontario; however, they also represented about 72 per cent of all vehicles involved in collisions.

Only about 1.4 per cent of all motor vehicles involved in collisions had apparent mechanical defects.

Figure 5 Vehicle Population by Vehicle Class in Ontario, 2010

Table 5.7: Vehicle Damage Level by Class of Collision, 2010

Damage	Class of Collision			Total
	Fatal	Personal Injury	Property Damage	
None	42	7,966	18,381	26,389
Light	83	22,567	136,966	159,616
Moderate	91	22,880	94,697	117,668
Severe	148	17,501	27,553	45,202
Demolished	485	8,517	5,853	14,855
Unknown	36	4,479	32,575	37,090
Total	885	83,910	316,025	400,820

Vehicle Damage

None: No visible damage.

Light: Slight or superficial damage. Includes scratches, small dents, minor cracks in glass that do not affect safety or performance of vehicle.

Moderate: Unsafe conditions result from damage. Vehicle must be repaired to make its condition meet requirements of law. Vehicle can be driven off road or limited distance but doing so would be unsafe.

Severe: Vehicle cannot be driven. Requires towing. Would normally be repaired.

Demolished: Vehicle damaged to the extent that repairs would not be feasible.

SPECIAL VEHICLES

6. SPECIAL VEHICLES

This section examines vehicles of special interest, including motorcycles, school buses, large trucks, snowmobiles, off-road vehicles and bicycles.

The ministry is continuously monitoring the safety of special vehicle types as many fatalities and injuries result from collisions that occur off road and involve off-road vehicles and snowmobiles. Safety of some other vehicle types such as bicyclists, motorcyclists, school buses or large trucks is always at the centre of public scrutiny.

6A. MOTORCYCLES

Table 6.1: Motorcyclists* Killed and Injured, 2001–2010

Year	Drivers		Passengers	
	Killed	Injured	Killed	Injured
2001	49	1,166	3	318

CONVICTION, OFFENCE AND SUSPENSION DATA

7. CONVICTION, OFFENCE AND SUSPENSION DATA

This section presents conviction, offence and suspension data related to motor vehicle use in Ontario. Convictions are summarized by legislation and conviction type.

In 2010, nearly 90 per cent of motor vehicle convictions were related to Highway Traffic Act (HTA) offences and 1.4 per cent were related to the Criminal Code of Canada (e.g., drinking and driving, dangerous driving, fail to remain).

In the last several years, the number of Administrative Drivers Licence Suspensions (ADLS) for drinking and driving has dropped from about 17,000 to around 16,000 occurrences annually.

Figure 7 Motor Vehicle Convictions in Ontario by Type, 2010

7A. CONVICTION DATA

Table 7.1: Summary of Motor Vehicle Related Convictions, 2010

Convictions*	Number
Highway Traffic Act (HTA)	1,297,137
Regulations under the HTA	12,741
Criminal Code of Canada**	21,093
Municipal By-Law***	1
Motor Vehicle Collision Claim/Compulsory Insurance Act	97,736
Motorized Snow Vehicles Act	2,054
Off-Road Vehicles Act	1,899
Out of Province Exchange (HTA)	27,493
Others****	2,074
Total	1,462,228

* Includes manually recorded convictions.

** This figure does not include 782 convictions for young offenders under the Criminal Code.

*** In previous years a large portion of convictions under HTA Regulations were allocated to convictions under Municipal By-Law.

**** Others may include Acts not listed above, such as Motor Vehicle Safety Act.

Table 7.2: Motor Vehicle Convictions Related to the Highway Traffic Act, 2010

Convictions	Number
Equipment	23,058
Administrative*	203,735
Seat Belt (Driver & Passenger)**	33,285
Other Non-Pointable Convictions ***	126,530
Speeding	755,148
Other Pointable Convictions (2 - 4 pts)	128,091
Other Pointable Convictions (5 - 7 pts)	11,665
Driving While Suspended	15,625
Total	1,297,137

* Non-moving, weight, vehicle registration, licence renewal, etc.

** Failure to wear seat belt convictions registered against passengers over 16 are no longer included.

*** Now includes some out-of-province convictions.

Table 7.3: Motor Vehicle Convictions Related to the Criminal Code, 2010*

Convictions	Number
Alcohol Related**	16,926
Criminal Negligence	13
Fail to Remain at Collision	457
Fail to Stop for Police Officer	450
Driving While Disqualified	2,141
Dangerous Driving	1,105
Motor Manslaughter	1
Total	21,093

* Does not include 782 convictions for young offenders.

** Includes some out-of-province convictions.

7B. OFFENCE DATA

Table 7.4: Number of Driver* Convictions for Criminal Code of Canada Offences, 2001–2010**

8. APPENDIX

8A. GLOSSARY

Ability Impaired Alcohol:

Driver had consumed a sufficient amount of alcohol to warrant being charged with a drinking and driving offence.

Ability Impaired – Alcohol over 0.08:

Ability Impaired, Alcohol: Driver had consumed alcohol and upon testing was found to have a blood-alcohol level in excess of 80 milligrams per 100 millilitres of blood.

Administrative Driver's Licence Suspension (ADLS):

This program, designed to reduce drinking and driving, started November 29, 1996. Under this program, provincial law permits the immediate suspension of a driver's licence for 90 days upon evidence gathered by a police officer that the driver (a) was shown to have a concentration of alcohol in excess of 80 milligrams per 100 millilitres of blood or (b) the driver failed or refused to provide a breath or blood sample.

Alcohol Involved:

This category includes drivers reported as "Had Been Drinking", with "BAC > 80 mg/100mL" or with "Ability Impaired by Alcohol".

Class G1 Driver's Licence:

A holder of a Class G1 driver's licence:

- must have a zero blood alcohol concentration while driving;
- must have an accompanying driver who is a fully licensed driver (Class A, B, C, D, E, F or G) with at least four years driving experience and has a blood alcohol concentration less than 0.05;
- the accompanying driver must be the only passenger in the front seat with the G1 driver;
- unless accompanied by a licensed driving instructor, must not drive on Ontario's "400-series" highways or on high speed expressways such as the Queen Elizabeth Way, the Don Valley Parkway, E.C. Row Expressway and the Conestoga Parkway;
- must ensure the number of passengers in the vehicle is limited to the number of working seat belts;
- must not drive between the hours of midnight and 5 a.m.;
- may drive a Class G vehicle only.

The G1 licence period lasts at minimum 12 months. It can be reduced to eight months by successfully completing an approved driver education course. For information about approved courses, call ServiceOntario at 1-800-268-4686. At the end of the G1 licence period, drivers must pass a road test before proceeding to the G2 licence period.

Class G2 Driver's Licence:

A holder of a Class G2 driver's licence:

- must have a zero blood alcohol concentration while driving;
- is allowed to drive any motor vehicle that requires a Class G driver's licence on the road;
- must ensure the number of passengers in the vehicle is limited to the number of working seat belts;
- for the first six months, G2 drivers aged 19 and under cannot carry more than one passenger aged 19 and under between midnight and 5 a.m.
- after the first six months, G2 drivers aged 19 and under cannot carry more than three passengers aged 19 and under between midnight and 5 a.m.*

The G2 licence period lasts at minimum 12 months. After completing, drivers are eligible to take a comprehensive test to qualify for full licence privileges.

Class M1 Motorcycle Driver's Licence:

A holder of a Class M1 motorcycle driver's licence:

- to operate motorcycle, limited-speed motorcycle (motor scooter) or motor-assisted bicycle (moped) for the purposes of training;
- must have a zero blood alcohol content while driving;
- is only allowed to drive during daylight hours (one-half hour before sunrise to one-half hour after sunset);
- must not ride on highways with speed limits of more than 80 km/h except highways 11, 17, 61, 69, 71, 101, 102, 144, 655;
- must not carry passengers.

The M1 licence period lasts at least 60 days, and the licence is valid for 90 days. M1 drivers must pass the M1 road test before proceeding to the M2 licence period. Alternatively, during the M1 period, they may take an approved motorcycle or motor scooter safety course that includes a road test, instead of the ministry road test.

Class M2 Motorcycle Driver's Licence:

A holder of a Class M2 motorcycle driver's licence:

- must have a zero blood alcohol concentration while driving.

After completing the M2 licence period, drivers will be eligible to take a comprehensive test to qualify for full licence privileges. Drivers may take an approved M2 Exit motorcycle safety course that includes a road test, instead of the ministry road test.

Class M2/M with L Condition:

A Class M2 or M with L Condition is a motorcycle licence that restricts the licence holder to operating mopeds or limited-speed motorcycles.

Conviction:

Registered when a person pleads guilty to, or is found guilty of, an offence related to a motor vehicle under any Act of the Ontario Legislature or its accompanying regulations, under the Parliament of Canada or any accompanying order, or under any municipal by-law.

Driver:

Unless specified otherwise, any person, whether licensed or not, considered to be in care and control of a vehicle at the time of a collision.

Fatal Collision:

A motor vehicle collision in which at least one person sustains bodily injuries resulting in death. Prior to January 1, 1982, fatal collision statistics included deaths attributed to injuries sustained in the collision, for up to one year after the collision. Since that date, only deaths occurring within 30 days of the collision have been included.

Had Been Drinking:

Driving after having consumed an amount of alcohol not considered sufficient to be legally impaired or with a measured blood alcohol count of greater than zero but less than 80 milligrams per 100 millilitres of blood. As of May 1, 2009, a blood alcohol concentration from 0.05 to 0.08 results in a 3, 7, or 30-day roadside driver's licence suspension for first, second, or third-time occurrences, respectively. Immediately prior to that date, a blood alcohol concentration from 0.05 to 0.08 resulted in a 12-hour suspension.

Hanger-on:

Hangers-on are persons hanging onto a moving motor vehicle's fenders, bumpers, doors or other parts of the vehicle and not located inside; for example, someone riding in back of a pick-up is not a hanger-on.

Highway:

A common and public highway, street, avenue etc., any part of which is intended for public use or used by the general public for the passage of vehicles, and including the area between the property lines.

Kilometres Travelled:

Prior to 2000, vehicle fleet mileage was estimated on the basis of taxed gasoline and motor fuel sales. Starting in 2000, vehicle kilometres travelled are based on estimates provided by Statistics Canada and Transport Canada.

Limited-Speed Motorcycle (Motor Scooter):

A limited-speed motorcycle is also known as a "motor scooter."

Motor scooters can be either electric or gas powered with a "step through" design and have a maximum speed of 70 km/h. Most motor scooters have automatic transmissions, with a maximum engine displacement of 50 cubic centimeters.

Major Injury:

A non-fatal injury severe enough to require that the injured person be admitted to hospital, even if for observation only.

Minimal Injury:

A non-fatal injury, including minor abrasions and bruises, which does not necessitate the injured person going to a hospital.

Minor Injury:

A non-fatal injury requiring medical treatment at a hospital emergency room, but not requiring hospitalization of the involved person.

Motor-Assisted Bicycle (Moped):

A motor-assisted bicycle is also known as a “moped”. Mopeds have pedals that can be operated at all times. Mopeds can be either electric or piston powered and have a maximum speed of 50 km/h.

Mopeds have a piston displacement of not more than 50 cubic centimetres.

Motor Vehicle Collision:

Any incident in which bodily injury or damage to property is sustained as a result of the movement of a motor vehicle, or of its load while a motor vehicle is in motion.

Off-Highway Collisions:

A collision that occurs off a public highway. It can include collisions located on or adjacent to trails and paths, on the surface of a frozen lake or river, or in a private parking lot.

On-Highway Collisions:

A motor vehicle collision which occurs on the highway between the property lines.

Pedestrian:

Any person not riding in or on a vehicle involved in a motor vehicle collision.

Personal Injury Collision:

A motor vehicle collision in which at least one person involved sustains bodily injuries not resulting in death.

Property Damage Collision:

A motor vehicle collision in which no person sustains bodily injury, but in which there is damage to any public property or damage to private property** including damage to the motor vehicle or its load.

Reportable Collision:

Any collision involving injury or damage to private property in excess of a monetary value prescribed by regulation.**

Self-Reporting of a Collision:

Under the Highway Traffic Act [s.199 (1.1)], when one is in a collision in which there is only property damage (no injury or death, and, among other conditions, no criminal activities such as impaired driving) the involved person(s) may report the collision immediately by proceeding with one's vehicle to a Collision Reporting Centre. Self-Reporting of a collision was introduced on January 1, 1997.

Suspension:

Withdrawal of a driver's privilege to operate a motor vehicle for a prescribed period of time.

*These passenger restrictions do not apply if the G2 driver is accompanied by a full "G" licensed driver (with at least four years driving experience) in the front seat, or if the passengers are immediate family members.

**The minimum reportable level for property damage only collisions rose from \$200 to \$400 on January 1, 1978 and rose again to \$700 on January 1, 1985. As of January 1, 1998, the minimum reportable level for property damage only collision is \$1,000.
