These additional requests related to three class-action proceedings brought on behalf of individuals who lived at provincial residential facilities for individuals with a developmental disability. A dedicated team of staff worked to respond to these requests, which resulted in the release of over 2.1 million pages of documents, most of which were decades old. The ministry waived all fees associated with access to these resident files. As well, the ministry proactively disclosed a very large (approximately 500,000 pages) group of documents related to the settlement of these class action proceedings, spanning 1945 to 2009.

Access Requests under *PHIPA*

Government organizations that are also health information custodians report statistics for the number of access requests made by individuals, or their substitute decision maker, for their personal health information. Not included in this report are clinics, doctors' offices or other health-care providers who are not required to file annual statistical reports. There were 85,156 requests for access to personal health information completed in 2014.

Outcome of Requests Completed*

	Number of Requests Completed
Full access provided	82,458
Partial access provided: provisions applied to deny access	39
Partial access provided: no record exists or cannot be found	154
Partial access provided: record outside of <i>PHIPA</i>	24
No access provided: provisions applied to deny access	57
No access provided: no record exists or cannot be found	1,321
No access provided: record outside of <i>PHIPA</i>	13
Other completed requests, e.g. withdrawn or never accessed	1,918
Total Requests	85,984
Number of requests that were not accessed following a fee estimate	454
Number of requests denied access in whole or in part where a provision of <i>PHIPA</i> was applied	96

*Requests, especially complex ones, may have more than one outcome disposition. For example, some of the records responsive to a request may be partially accessed with provisions applied while others may not exist or cannot be found. Such a request has multiple outcomes and therefore could be counted more than once in this table. Thus the total of this table may be greater than the total number of requests completed.
